## Submarine Cable in Philippines (SCIP)

### Overview

The Submarine Cable in Philippines (SCIP) is a domestic fibre optic festoon cable system with 12 cable segments linking Luzon to the islands in Visayas and Mindanao. The system is invested by Dito, the Philippines third telecom (PTO) operator.

In both 2020 and 2022, SBSS was contracted by HMN Tech to conduct the SCIP submarine cable project where a total cable installation of 1,620km was carried out, of which some 615km was plough buried.

### Key Challenges

- The project included 23 direct cable landings in the Philippines. CS Fu Hai set a new record by completing 3 direct cable landings within 3 days during the 2020 Christmas season.
- cs Fu Tai with QT1000 completed over 40km post-lay burial to target depth.
