Track Record

Longyuan Dafeng Offshore Wind Export Cable Installation

OVERVIEW

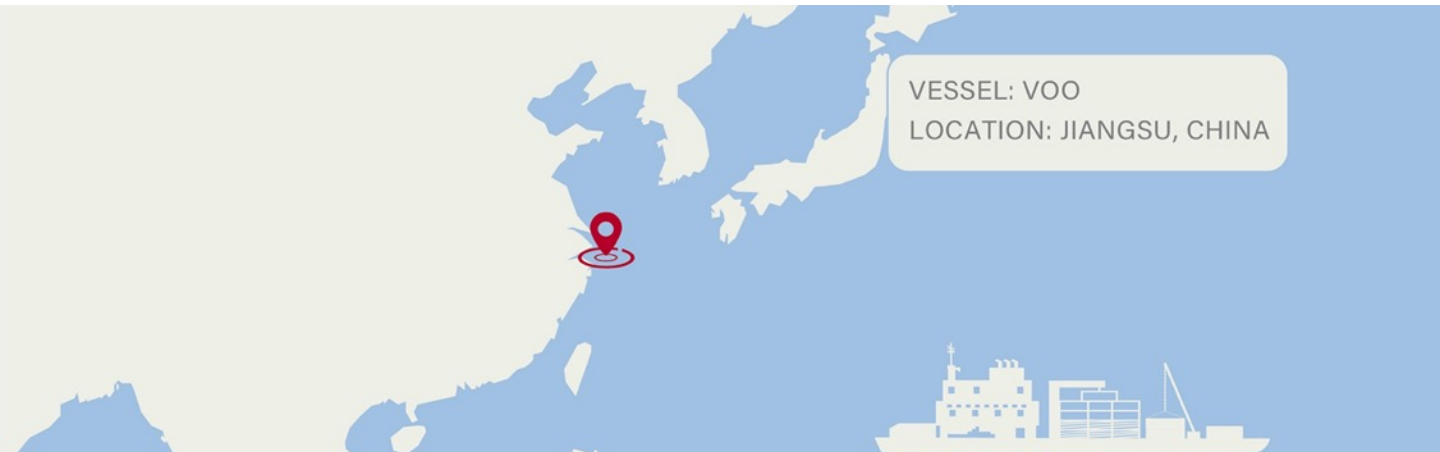

In 2019, SBSS was contracted by the Shanghai Foundation to install 19.5km of 220kV export cable in the Dafeng offshore wind farm, which was developed and operated by Longyuan, Jiangsu.

VALUE ADDED

By bringing our extensive deep water cable installation experience to bear, SBSS achieved precise cable laying, exacting cable burial and ahead-of-time project delivery for this shallow water project during the testing East China Sea winter season.

SCOPE OF WORK

- Transportation & Installation of 1 x19.5 km 220kV export cable
- Shore-end landing and J-tube pull-in to offshore sub-station
- Export cable burial to 3m below the seafloor
